

Flying to the USA? Here's what you need to do.

The United States has been our heartland for over 37 years and we can't wait to welcome you back onboard. Ahead of travel it's important to check the COVID-19 health and safety protocols relevant to you to ensure your journey goes smoothly. All foreign national visitors must be fully vaccinated, with limited exemptions.

The US Center for Disease Control and Prevention (CDC) provides full guidance for US citizens, US nationals, Lawful Permanent Residents, Non-US citizens and others. See cdc.gov/travelrequirements.

Requirement	Fully vaccinated adult	Non-vaccinated under 18 (travelling with fully vaccinated parent(s) or legal guardian(s))	Non-vaccinated under 18 (travelling alone or with unvaccinated adult)	Non-vaccinated adult (limited exceptions for foreign nationals)
 FDA-approved pre-departure COVID-19 test. Includes antigen (lateral flow), PCR or LAMP. Self-test must be video observed Children under 2 years old are exempt	✓ No more than 1 day before travel to the US	✓ No more than 1 day before travel to the US	✓ No more than 1 day before travel to the US	✓ No more than 1 day before travel to the US
 Passenger Disclosure and Attestation form completed within 72 hours of departure	✓	✓ Form completed on their behalf by legal guardian/parent	✓ Form completed on their behalf by legal guardian/parent	✓
 Accepted proof of fully vaccinated status ready before departure (with 14 days elapsed since final dose) Children under 18 years old are exempt	✓	✗	✗	✗ Documents required to confirm eligibility for exception
 Self-quarantine in the USA at the place you are staying (e.g. hotel)	✗	✗	✗	✓ 7 days
 COVID-19 test 3-5 days after arrival in the USA with arrangements confirmed on attestation form. Includes antigen (lateral flow), PCR or LAMP	✗	✓	✓	✓

 Applies to Non-US citizens or non-US immigrants only

US-recognised COVID-19 vaccines include:

- Oxford/AstraZeneca
- Covishield
- Pfizer-BioNTech
- Moderna
- Janssen
- BIBP/Sinopharm
- Sinovac
- Covaxin

Recovered from COVID-19 in the last 90 days?

If you've recovered from a documented COVID-19 case within the past 90 days as an alternative to the pre-departure test you may use your positive viral test result and an official letter that states you've been cleared for travel.

Mask up, folks

In line with US requirements, customers aged 2 and over travelling to or from the United States must wear a face mask onboard and at the airport, unless they are exempt.

Accepted proof of vaccination

The proof you use will depend on where your approved vaccine(s) were administered. Accepted vaccine certificates include NHS COVID Pass (UK); CDC vaccination card (US); and EU Digital COVID Certificate (EU).

All forms of proof - digital or paper format - must contain:

- Personal identifiers (full name and date of birth)
- Name of official source issuing the record
- Vaccine manufacturer and date(s) of vaccination.

Travelling with children?

The rules for unvaccinated children under 18 will depend on their age, if they're a US citizen, permanent resident or national, and whether they will be accompanied by a fully vaccinated parent or legal guardian. Check the CDC website for full details.

Confident you're an exempt adult foreign national?

There are a very limited set of circumstances where a non-vaccinated adult foreign national can enter the US. If you're sure you meet the criteria, you must bring documentation as applicable, confirming eligibility.

Check before you travel at cdc.gov/travelrequirements and gov.uk/travel-abroad. If you're eligible under the US Visa Waiver Program, don't forget to apply and obtain an ESTA for travel.

Once you've covered the important steps, the amazing part of your journey can begin. The USA is waiting for you.
